Applicant's election without traverse of Group I in the reply filed on 5/17/04 is acknowledged.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19, 27-44, 56 rejected under 35 U.S.C. 103(a) as being unpatentable over Shively in view of Benet et al and Yau.

Shively et al teach an emulsion containing taxol (Title). Oral administration is disclosed column 9 lines 51-94.

Benet et al teach essential oils to increase the bioavailability of pharmaceutical compounds (Title). Spearmint (claim 6) and taxol (claim 5) are disclosed.

Yau et al teach Gentisic acid as a radio protectant (column 29 lines 29-30). Taxol is disclosed (column 9 line 28).

It would have been obvious to one of ordinary skill to add an essential oil to the composition of Shively et al to achieve the beneficial effect of increasing the

^b bioavailability of taxol in view of Benet et al and to further add Gentisic acid as a radio protectant in view of Yau et al. It is well-known, even to the layman, that ^{chemotherapy} ~~chemotherapy~~ is given in ^{conjunction} ~~communication~~ with radiation therapy. Thus, it would be an obvious expedient to add a radioprotectant^o to protect taxol in the Shively et al composition.

No claims allowed.
